Abstract (en)
[origin: WO2008003708A2] The present invention relates to an oven (1) comprising a sealing element (6) used for maintaining an effective leak-proofing, having more than one profile (7) with a thin connective band (11) for joining these together and a joining element (12) that allows the assembly thereof such that the profiles (7) will not slide and be parallel to each other along the frame (4).
