Abstract (en)
[origin: WO2007147682A1] The invention relates to a method for visualizing geographic data by means of at least two-dimensional objects. In said method, at least one surface of the objects is covered with at least one texture, at least one of the textures being assigned to at least one of the surfaces of the object in accordance with at least one input factor. The invention also relates to a navigation device comprising a display unit and a control unit for carrying out the disclosed method.
