Abstract (en)

[origin: DE102007043614B3] The retainer (10) has a retaining bar (14) arranged horizontally after inserting the retainer into a cylindrical opening. An support is arranged in the opening below the bar that contains connected support bars (11-13), which runs horizontally after inserting the retainer into the opening. Connecting rods (15, 16) run vertically in the opening and connects the support with the retaining bar. A carrier unit is inserted below the retaining bar. The retainer rests with lateral outer surfaces of the support bars, the retaining bar and/or the connecting rod against an inner side of the opening.
