Abstract (en)

[origin: EP2036708A2] Rotor for a rotary tableting press with upper and lower punch guides for upper and lower punches, operating in conjunction with the holes of a matrix disc located between the upper and lower guides, where the punch in the can move axially in the holes of the punch guides includes a head which interacts with the press pressure rolls. The punches are prevented from rotating in the punch guide holes but are guided axially in these holes. The head has flat sections (56) on opposite sides.
