Abstract (en)

[origin: EP2037027A1] The guide has thread guide feeders (300) arranged on a tip of a thread guide arm (3), where distance of the thread guide feeders from a comb gap (200) of a flat knitting machine is adjustable. An adjusting unit (4) e.g. turning lever, is integrated in a thread guide slide (1), and position of the thread guide feeders from the comb gap is adjustable by the adjusting unit. The adjusting unit directly or indirectly acts on the thread guide arm, where the thread guide arm is movably arranged with respect to the thread guide slide.
