Abstract (en)

[origin: EP2037050A1] The present invention concerns discharge closure set for sanitary facilities and a sanitary facility using the same. More in particular, the present invention refers to a discharge closure set for sanitary facilities of reduced wear and easy to make comprising a plug (11) free to move between a first open position and a second closed position, and opening/closing means (15) adapted to cooperate with said plug (11) in order to move it to one of said two open or closed positions, said opening/closing means (15) comprising at least an element (18) moving between a first coupling position with said plug (11) and a second disconnection position characterised in that in said first coupling position, said moveable element (18) and said plug (11) are magnetically coupled.
