Abstract (en)
The system has a formwork element (1) for producing a cover, and another formwork element (2) for producing a concrete wall. The formwork element (1) has larger area when compared to the formwork element (2) and has length greater than 2.70 meter in particular greater than 4 meter. A minimum distance between frame side members or between cross beams of the formwork element (2) is smaller than that of the formwork element (1). The formwork element (1) has a folding unit to which supports for placing the formwork elements are fastened. An independent claim is also included for a method for producing a cover.

Abstract (de)
Die Erfindung betrifft ein System von Schalungselementen (1, 2) für die Herstellung einer Decke umfassend wenigstens ein Schalungselement, welches für die Herstellung einer Decke geeignet ist, sowie wenigstens ein Schalungselement, welches für die Herstellung einer Wand geeignet ist. Durch die Kombination solcher Schalungselemente lässt sich die Zahl der insgesamt auf einer Baustelle benötigten Schalungselemente minimieren.
