Abstract (en)
[origin: DE102007043757B3] The adjusting leaf hinge part (1) has an abutting piece (3) fastened on a leaf. Cooperating sections of the abutting piece and an adjuster part (4) consist of plane steel plates. A projection is bent outside from the plane plate of one of the two units of the leaf hinge part, which forms a guide surface extending in the adjustment device. The abutting piece and the adjustment part together with a receiver (33) for a band pin are covered by a covering hood.
