Abstract (en)
The invention relates to a built-in kitchen appliance (1) for multi purpose meal preparing usage mountable in a standard kitchen oven niche, comprising, a main cavity (2) having first radiant heating means for generating radiant heat and/or fan heating means comprising second radiant heating means in combination with a fan for supplying circulating heat, a secondary cavity (3) having secondary heating means for the secondary cavity. This built-in kitchen appliance is to be improved to allow its user to perform a variety of meal preparing processes while at the same time saving space and costs in the home kitchen. For achieving this object the steam oven device is characterised in that the main cavity further comprises means for microwave cooking and/or means for steam cooking.
