Abstract (en)
[origin: EP2037541A2] The plug connector (1) has multiple wrap pins (3) and a housing (2) in which the wrap pins are arranged. The wrap pins consist of a collar (16) which is arranged between two insulators for the transmission of forces in axial direction of the wrap pins. The insulators are arranged in axial direction with form closure in the housing. A plate (5) is arranged in the housing with discrete electrical components (26) and with one of the wrap pins electrically connected to it. The plate is mechanically decoupled to the wrap pins or to the housing.
