Abstract (en)

[origin: WO2008002232A1] The present invention relates to a container for solids or liquids, comprising a hollow body which holds the content, a closure which cooperates with the body to close the container and a compliance aid device arranged on the container for indicating the time at which the last dose was taken or when the next dose is due. The compliance aid comprises a movable first part and a fixed second part provided on the hollow body, wherein the first part is automatically moved to a new indicating position in relation to the second part upon moving the closure in relation the hollow body.
