Abstract (en)

[origin: WO2008000376A1] The subject matter of the present invention is a device for handling flexible, hose-like objects, in particular, bags (1). The device consists of a framework (5) and at least one object on the stage (3) of a track (4) impinging the handling device (2). According to the invention, a free space (11) is created under the track (4) of the object, at least in the area of the stage (3).
