Abstract (en)  
[origin: WO2008109542A1] Embodiments of the present invention relate to a method of implementing an incentive-based recycling system. In one embodiment of the present invention, a method of implementing a system of incentive-based recycling comprises dispatching a vehicle on a route, lifting a pickup cart comprising a volume of collectable recyclable material and having a radio frequency identification (RFID) readable tag disposed thereon, weighing the collectable recyclable material on a weighing device, using a radio frequency identification reader to obtain a unique set of identification data from the pickup cart, removing the pickup cart from the weighing device, transporting a volume of collectable recyclable material to a drop-off facility, validating collected weight data and identification data, uploading the data to a central database, generating at least one report from the data uploaded to the central database, and allocating rewards to a customer corresponding to a unique set of identification data.
