Abstract (en)

[origin: WO2008109540A2] Embodiments of the present invention generally relate to a recycling system and method thereof. More specifically, embodiments of the present invention relate to a method of implementing an incentive-based recycling system which rewards clients for recycling recyclable goods via financial or other incentives. In one embodiment, a method of implementing a system of incentive-based recycling comprises dispatching a vehicle on a collection route, collecting recyclable material from a series of collection points, obtaining unique identification data from each collection point, dropping off recyclable material at a drop-off facility, uploading the unique identification data to a central database, and allocating rewards to a customer corresponding to a measurement of the unique identifying data.
