Abstract (en)

Portable massaging head for an apparatus for localised massages for aesthetic use and for health comprising a moveable container (1) for hot (11) and cold (14) water producing means and for controlled circulation means (16;17;18) adapted to convey said liquids to the portable massaging head, said massaging head comprising a plurality of button elements, wherein said button elements (4) are movable by means of compressed air coming from a related compression and distribution system, said portable massaging head (5) further comprising: - a cup-shaped container (6) , for the alternate circulation of hot and cold water, provided inside which is a plurality of sliding seats (62) for the plurality of button elements (4), the button elements being free of contact with the liquid; - an intermediate disk (7) adapted for hydraulic sealing of the cup-shaped container (6) and comprising a plurality of holes (71) for the passage of said compressed air for alternate actuation of said button elements (4) and a plurality of holes (72) for supplying said hot and cold water to said cup-shaped container (6); - a cover (8) overlapped with pneumatic and hydraulic sealing to the abovementioned intermediate disk (7) and provided with hot and cold water inlet/outlet holes (81) and with holes (82) for the introduction of said compressed air, the latter holes communicating with channels (83) related to said passage holes (71) of said intermediate disk (7).
