Abstract (en)

The object of the present invention is an automatic system to adjust the positioning of the grinding wheels on a grinding machine, especially for the grinding of glass plates, characterized by the fact that it comprises a locator (4) for each grinding wheel (8) and driving means for said locators (1, 2, 6, 7, 9) set up outside the glass plate processing area and therefore out of contact with the grinding wheel cooling fluid and the dusts originating from the grinding process
