Abstract (en)

A guide track (14) for a roll-up door of the type comprising a flexible closure sheet (10) having side edges (10') sliding within elastically deformable vertical guide tracks (14) to allow the dislodgement of the closure sheet (10) when subjected to an impact or external forces. Each of the guide tracks (14) comprises a base member (15) and a guide channel (16) for the closure sheet (10), in elastomeric material, and an elastically yielding protective wing (24) extending from the base member (15) on the front side and along the guide channel (16) of the track.
