Abstract (en)
[origin: WO2008003090A2] A product for topical application comprising a chemical composition comprising in combination a linker agent and a compound comprising at least one UV-absorbing chromophore, wherein the linker agent is characterized by the general formula: "embedded image" wherein: X1 and X2 are the same or different, and at least one of X₁ or X₂ is a functional group that bonds with the compound comprising at least one UV-absorbing chromophore, and b+f = 2; Y comprises an O, N, or S that is substituted or unsubstituted; each a, b, c, e and f is = 0 and a+b+c+e+f = 2; d is 0 or 1; n1 and n2 represent the number of hydrogen atoms required to complete the undesignated valencies; and m ranges from 1 to about 100 and each individual m unit may be the same or different, and a topically acceptable agent that is different from the linker agent and the compound comprising at least one UV-absorbing chromophore.
