Abstract (en)
[origin: WO2008006635A1] The invention relates to a hand-held machine tool for driving a bit which can be accommodated in a tool holder (32), with a rotary and/or hammer action, said machine tool comprising a drive train (50) which has a drive side (12) associated with a drive unit (16) and a driven side (14) associated with the tool holder (32). According to the invention, the hand-held machine tool comprises at least one decoupling unit that is used to form a rotationally elastic coupling between the drive side (12) and the driven side (14).
