Abstract (en)  
[origin: CA2656476A1] The invention relates to a multilayer film comprising a layer A which is based on a thermoplastic polymer or a mixture of several thermoplastic polymers having a melting point Tm A and a Vicat softening point TV A and has a maximum layer thickness of 40 .mu.m, and a layer B that directly adjoins layer A, is based on a thermoplastic polymer or a mixture of several thermoplastic polymers having a melting point Tm B and a Vicat softening point TV B, and has a maximum layer thickness of 50 .mu.m, wherein TV B < TV A and Tm B < Tm A; TV B <= 115°C. The inventive multilayer film comprises at least one at least monoaxially oriented layer while comprising an external sealing layer. An area D that is printed and/or metallized and/or coated with a (semi)metal oxide is arranged between layer A and layer B. The minimum interlayer adhesion between layer A and layer B amounts to 1.0 N/15 mm.
