Abstract (en)
[origin: WO2008006833A1] A feed unit (2) for feeding fuel has a housing (23) formed integrally with the casing (18) of a swirl pot (7), the housing comprising a fine filter (9). The fine filter (9) is configured open toward one side and is closed by a cover (25). The cover (25) is formed integrally with a base plate (17) sealing the casing (18) of the swirl pot (7). As a result, the feed unit (2) has a particularly low number of components to be assembled and can be produced in a particularly cost-effective way.
