Abstract (en)

[origin: WO2008006441A2] The invention relates to a locking element (1) for attaching a housing (2) of a high-frequency device of a vehicle to a holder (4). Said locking element (1) can be actuated by means of a tool (8) for removing the device from the holder (4). The inventive locking element (1) is embodied as a planar punched bent part that comprises a first section (11), a second section (13) that forms an angle and adjoins the first section (11), and a locking section (14) adjoining the second section (13).
