Abstract (en)

[origin: WO2008004262A1] A method for consolidating natural stone blocks, particularly marble and granite, to be subjected to subsequent sawing. The method is based on the application, to at least one face (11) of the block (1) to be consolidated which is intersected by at least one predefined cutting plane (4), of at least one layer (3) of polymeric resin, which is adapted to adhere to the face in order to consolidate the block before cutting operations.
