Abstract (en)
[origin: WO2008006665A1] A pump-out section (5) for a washing machine (4) having a washer drum (6), a detergent solution pump (24) and a return container (30) provided in the pump-out section for filling the outlet region in the detergent solution tub (2), is supposed to be implemented in a cost-efficient and easy-to-assemble manner. For this purpose, a lower pump-out pipe piece (25), the return container (30) and an upper pump-out pipe piece (26) are configured in one piece at least partially as a bendable tube (71), which is fed at least partially through a tube holding device (1).
