Abstract (en)
[origin: WO2008007183A1] The method of operation applies to a home automation installation comprising a mobile remote control unit and an electrical actuator, the mobile remote control unit being provided with means for detecting its angle of inclination with respect to a reference line. It is characterized in that a first mode of operation of the installation or a second mode of operation of the installation is activated depending on the angle of inclination of the mobile remote control unit.
