Abstract (en)
[origin: EP2042666A2] The fastening element (1) has a pressure disk (4), where a pin case is provided adjacent to the pressure disk for supporting a spreading element (6) with a spreading element head (7). Milling fixtures (9) are arranged at lower side of the pressure disk in installing direction for milling out the insulator plate. A recess (10) is provided to pass through the milled out insulator. Independent claims are included for the following: (1) a device for driving a fastening part; and (2) a method for recessed mounting of an insulator plate at a sub-structure by a fastening part.
