Abstract (en)
[origin: EP2042802A1] The luminaire (1) has a luminaire housing (2) with an opening in a radiation direction, and a partially transparent covering profile detachably fastened in the opening, where the covering profile is formed as a hollow chamber profile (3). The chamber profile has light input and output sides, where a hollow chamber (13) is provided between the sides. A surface of the input side turned away from the hollow chamber has a support surface for a sealing (4) at its edge. The surface of the input side rests at the housing, and the sealing is provided between the support surface and housing.
