Abstract (en)

[origin: EP2042810A2] The present invention discloses a fixation apparatus for electrical heating elements developed for vitroceramic cookers. Said cooker (1) comprises a frame (2); a vitroceramic glass (3) provided on said frame (2); electrical heating elements (4) provided at the lower surface of said glass (3); and at least one apparatus (5), which by being fastened to the edge of said frame (2) is used for fixing said heating elements (4) under said vitroceramic glass (3). Said apparatus (5) comprises a wing (10) region extending to both sides at the front; downward-facing curved protrusions (17, 17') extending from both sides of said wing (10); a hole (16) provided on said wing (10); a tail region (11) extending backward from the rear of said wing (10); a downward-facing curved protrusion (12) at the farthestmost point of the tail (11); and a downwardly-tapering protrusion (13) at the lower part of said protrusion (12).
