Abstract (en)
The device (2) has a crimp sleeve, and a connecting part, where the device is designed to realize and/or form crimping regions in a cable during operation. The crimping regions are displaced axial to each other in a direction of the cable. Crimping plungers are moveably arranged axial to each other, and are fixedly coupled with each other in a rotatable manner. The plungers have cam plates coupled with each other and acting on radially displaceable crimping dies. The cam plates have cams displaced to each other in a circumferential direction in a coupled condition.

Abstract (de)
Crimpvorrichtung (1) zum Vercrimpen einer Baugruppe, die zumindest ein zu vercrimpendes Kabel (5) und wenigstens eine Crimphülse (6) sowie vorzugsweise einen Stecker (4) aufweist, wobei die Crimpvorrichtung dazu ausgelegt ist, bei nur einem Arbeitsgang wenigstens zwei oder mehr axial in Richtung des Kabels (5) zueinander versetzte Crimpbereiche (7, 8) einzubringen bzw. auszubilden.
