Abstract (en)

[origin: WO2008012065A1] The invention relates to a method of manufacturing a sculpted mabe pearl comprising: - a step of positioning, beneath the cover of a mollusk, a dome-shaped nucleus having a sculpted relief, and - a step of immersing the mollusk provided with its nucleus in sea water for a specific period. The invention is characterized in that the step of positioning is preceded by a step of sculpture modifying the relief of said nucleus, involving reducing the height of the relief on the zone or zones of the nucleus that have planar surfaces or concave surfaces to be accentuated.
