Abstract (en)
[origin: WO2008008073A1] A contact lens package (10) includes a holder (12) having a receptacle for holding a contact lens and a (cap14) having a seal for sealing a contact lens within the receptacle. The cap (14) is attached to the holder and is movable from an end of the holder where the receptacle is formed toward an opposite end of the holder. As the cap moves toward the opposite end of the holder, the end of the holder where the receptacle is formed ruptures the seal such that the contact lens can be removed from the package.
