Abstract (en)

[origin: WO2008014277A2] Apparatus, systems, and methods to support a patient or other person include a first material that is substantially air impermeable welded to a second material that is substantially air permeable and liquid impermeable. The first material may also be liquid and vapor impermeable and the second material may be vapor permeable. Exemplary embodiments may include an inflatable enclosure formed from a sheet of the first material with an aperture, and the second material may cover a portion of the aperture.
