Abstract (en)

[origin: WO2008009716A1] The invention relates to an arrangement (90) comprising a support (10) and nanoparticles (40, 70) that are located thereupon. According to the invention, at least two nanoparticles (40, 70), both of which are made of a metal material (M1, M2) and are different regarding the metal material, are disposed at a distance from one another on a surface (130) of the support (10). The two metal materials have a different degree of preciousness.
