Abstract (en)

[origin: WO2008009447A2] The invention relates to a method for producing a multilayered body (4) comprising an electroconductive layer (42₁) arranged on a carrier layer (41). According to said method, a transfer film (5) comprising a transfer layer (52) consisting of an electroconductive polymer is provided. The electroconductive layer is transferred from the transfer film (5) to the multilayered body (4). The invention also relates to a transfer film and a multilayered body produced using said method.
