Abstract (en)
[origin: WO2008008061A1] A product packaging for a solid product comprises a base, a lid, and a seal. The base has a top, sides, and a bottom forming a cavity configured and arranged to receive a solid product, and the base has an exterior surface. A texture is on the exterior surface of the base, whereby the texture enhances a user's ability to grip the base when the base is inverted. The seal interconnects the top of the base and the lid and allows the lid to be peeled away from the top of the base.
