Abstract (en)
[origin: WO2008003894A2] Fluid product dispenser comprising: a fluid product container (10) of variable usable volume, in which the fluid product is stored out of contact with the air, the container having an actuating wall (25) that is movable axially backwards and forwards between a rest position and a depressed position, movement of the wall causing the pressure in the container to vary, the wall being situated on one side of the dispenser; and a dispensing hole (150) through which the fluid product is dispensed, the hole being provided with an outlet valve (4); said dispenser being characterized in that the hole (150) is situated on a side of the dispenser other than that on which the actuating wall (25) is situated.
