Abstract (en)

[origin: WO2008006551A1] The present invention relates to a key unit for a lock system of a vehicle, with a device for opening and closing a lock system, in particular with a transmitter for remote activation of the lock system and/or a mechanical key. The key unit has a modular construction comprising a key container (1) and an attachment (2). The key container (1) accommodates the device for opening and closing the lock system. The attachment (2) is connected releasably to the key container (1) and permits diverse configurations of the key unit.
