Abstract (en)
[origin: CA2659086A1] The invention relates to a protection device for a military vehicle (1) which is used as a support vehicle and can carry out all engineering and maintenance work, said device comprising a chassis (4) as the base of the different types of vehicle and a crew cell (3) for receiving the crew (2). Said crew cell (3) has a high surrounding ballistic protection consisting of an adapted mine protection plate (41) in the region of the crew cell (3), a hood (5) which surrounds the crew cell on the sides and the top and has a lateral adaptive protection (51) and a roof protection (52), and an additional armoured plating (31) in the outer region of the crew cell (3). The chassis (4) and the undercarriage region (42) are protected only against a ground threat.</ SDOAB>
