Abstract (en)
The present invention relates to an article of furniture comprising a furniture body (11) formed by interconnected frame members(12) defining spaced portions (13) between said frame members (12) and at least a rigid casing member (14) being secured partially or entirely on said furniture body (11), and weaving works (15) provided on said furniture body (11), characterized in that said furniture body (11) being provided with a running and protruding shaping element (16) secured on the surface portions thereof to form an ergonomically-shaped profile and anthropometric contour that is independent and different from the profile, contour and shape initially defined by said frame members (12), spaced portions(13) and casing member (14) of said furniture body (11).
