Abstract (en)
[origin: EP2045426A1] The arrangement (20) has a steel part (21) with a guide section (23) for guiding the steel part into a connecting rod channel of a wing. A wing fixing stand (22) is connected with the steel part, and the steel part is designed as a punching-bending part or laser-cut bending part. The steel part has a sectioned traction unit (24) running parallel to the guide section, where a free end (26) of the guide section is connected with the traction unit. The wing fixing stand is connected with the steel part via a set screw (29).
