Abstract (en)

[origin: EP2045432A1] The arrangement has glass retaining strips (7, 7') for fixing a surface element at a side of a frame (1) at two profiles forming a corner region of the frame. A glass sealing (8) is arranged between the glass retaining strips and the surface element. A sealing element (20) is arranged in the corner region formed by the profiles, and is designed as a corner element (10). A front side of the glass retaining strips is two-dimensionally adjoined at the corner element. The glass retaining strips are associated to the profiles and arranged at sides of the profiles.
