Abstract (en)  
[origin: EP2045550A2] The freezer (10) has a set of components arranged on an aggregate carrier (8) for cooling. The aggregate carrier is formed in such a manner that it is accommodated in different installation positions in a base (9) of the freezer. The aggregate carrier is formed symmetrically, where the aggregate carrier and the base are mirror-inverted to each other. The components are a condenser (4), a compressor (7), an evaporation shell (1) and a blower (6), where the compressor is arranged on a swiveling plate.
