Abstract (en)

[origin: WO2008012501A1] The invention provides a silencer (1) for a marine engine being arranged for connection to an exhaust outlet (5) of an in board marine engine, the silencer comprising: a housing defining a helmholtz resonator chamber (8) and an expansion chamber (10); and, a baffle (12) arranged within the housing between the expansion chamber and the resonator chamber, the baffle having a first opening (11) for receiving an inlet (4) or an outlet duct and a second opening (13) defining an opening to the resonator chamber the silencer being arranged so that, in use, at least one of an inlet duct and an outlet duct passes through the resonator chamber, wherein the resonator chamber is arranged in use to be substantially free of water. In embodiments, the invention also provides a vessel including such a silencer.
