Abstract (en)
[origin: WO2008015166A2] In order to be able, in the production of a housing (10) for a crankcase ventilation device (10) having at least one inlet pipe (3) and an outlet pipe (2) which is arranged axially offset with respect to said inlet pipe (3), to adapt the angular positions of the pipes (2, 3) with respect to one another in a simple and cost-effective manner, it is provided that the crankcase ventilation housing (10) is divided at least into a lower housing part (4) and an upper housing part (1) on which the inlet pipe (3) is integrally formed, wherein the lower housing part (4) and the upper housing part (1) are connected to one another by means of an annular snap-action connection.
