Abstract (en)

[origin: EP2047998A2] A connecting piece (15) with an ink-discharge opening (16) on the underside/base (14) of a casing produces a fluid connection between an ink chamber (12) and a feeder connection on an ink-jet printer. In front of the ink-discharge opening, especially in front of the connecting piece for it, there is an ink-supply channel (17) that extends over a predefined height for the connecting piece and fits in the underside/base (14) of an ink cartridge.
