Abstract (en)

[origin: EP2048101A2] The method for powering a rolling press involves several press units for pressing on at least one press material track (10, 10') and a dispenser structure (14) for longitudinal separation of at least one of the tracks and has a folding structure (21) with at least one former (20) for longitudinal forming of section tracks, whilst there is a forming apparatus for separating off examples.
