Abstract (en)  
[origin: EP2048292A2] A siphon channel (16) runs in the longitudinal direction of a drainage gutter (11) that extends over its whole length and fits so as to run around in the edge area of a shower. The drainage gutter has a side wall (17b), on which an outlet opening (14) discharges. The siphon channel has a siphon gutter (17) with an opening on its upper side, through which a separating wall (19) protrudes into the siphon gutter so as to divide the siphon wall into two chambers.
