Abstract (en)

[origin: EP2048320A1] The apron (1) has adjustable blades articulately connected with each other by matched blade pairs, where each blade pair has two blades (2A, 2B) with a covering filler strip. The blade (2A) is integrated with transmission units (8) at ends (6A, 7A), where the transmission units present an empty stroke with respect to other transmission units (9). The transmission units (9) are integrated with ends (6B, 7B) of the blade (2B), where both the transmission units are formed under a form of straps made of metallic steel strap and plastic material.
