Abstract (en)
The device has a base and a flat lamp-shade (A) pre-cut in a foldable semi-rigid plastic support of which different elements are folded and assembled one above the other so as to form the device. The lamp-shade is in the form of a disk and a band, and two straps are fixed at an interior of slits (F) for locking an assembly when the base is folded, where the straps are positioned at an end and the slits are positioned at another end. One of the straps is unfastened from one of the slits when the base is locked.

Abstract (fr)
L'invention concerne un dispositif luminaire comprenant un socle et au moins un abat-jour. L'invention se caractérise en ce que ledit socle et ledit abat-jour sont prédécoupés dans un support semi-rigide dont différents éléments sont pliés et s'assemblent les uns aux autres de manière à former ledit dispositif. L'invention s'applique à la réalisation de dispositifs lumineux à bas coûts, de formes et dimensions variées, à partir d'un support semi-rigide pliable.
