Abstract (en)

Described herein is a detection system of the presence of a plurality of workers in a workplace. Advantageously according to the invention, the system comprises at least a mobile input peripheral device (8) provided with input means (13) adapted to receive data (A') uniquely associated to workers (2) and means (111) for the detection of the position (D') of the workplace on the terrestrial globe. In addition, described herein is a method for detecting the presence of a plurality of workers in a workplace.
